

# Teddy Bear Instructions

## Patterns

- Each bear pattern is in two parts as a PDF file, on the OWQG website. Just click on the underlined link for.
- **Teddy Bear Upper Body pattern** and **Teddy Bear Lower Body pattern**
- Print the pattern and join the two sections. You will be able to see the outlines to align the two pieces and join them.
- Transfer the pattern to freezer paper
- Hint - freezer paper can be ironed on material many times, instead of pinning to the material each time.

## Assembly

Bears should be made from 100% cotton material, fleece, corduroy, red/white/blue material, plaids, children's pattern, etc Bears made from red, white & blue fabric are preferred. Small scale child prints can also be used.

1. Cut 2 pieces of fabric, you need at least a 14" by 14" piece of material.
2. Put right sides together.
3. Pin pattern to the fabric
4. Cut the pattern 1/4" outside the tracing lines of the bear
5. Sew on the traced line leaving an opening for turning.  
**Remember to shorten stitches when sewing**
6. Clip all curves
7. Turn right side out and stuff, making sure that head, arms and legs are tightly stuffed
8. Whip stitch the opening closed

Marcia Bonifas ([mbonifas@verizon.net](mailto:mbonifas@verizon.net) or 302-539-7261) is collecting the bears. Also contact Marcia for any questions about assembly.
